

University Hospital Bern (Inselspital), Department of Obstetrics and Fetomaternal Medicine,
 Offers a position to join us immediately or by arrangement
 Limited for two years with the option of extension

Research Associate

50-100 %

The Department of Obstetrics and Fetomaternal Medicine at the Inselspital Bern is a tertiary care centre of maximum perinatal care. The Department conducts high-end preclinical, translational and clinical research as part of the University's research mandate. Our Prenatal Medicine Research Laboratory is integrated in the Department for Biomedical Research (DBMR) of the University of Bern. To complement the team, we are looking for a Research Associate.

Your challenge

The focus of the position is the further development and translation of preclinical cell-based therapies with the aim of clinical application in the field of prevention and therapy of perinatal brain damage in close collaboration with the Prenatal Medicine Research Laboratory.

Your profile

- You have a master's or university degree in biomedicine, molecular biology, medicine or a similar field
- Ideally, you have experience with business models and start-up projects
- You are interested in science and have excellent analytical skills
- You like to work in a team, but at the same time you have a high degree of independence
- You have very good communication skills and can easily communicate in German and English

What we offer

- Attractive working environment in an interdisciplinary research setting
- Various opportunities for further training
- Collaboration with SITEM (Swiss Institute for Translational and Entrepreneurial Medicine)
- Possibility to further develop your own academic career
- High degree of autonomy
- Flexible working hours and the possibility of working from a home office
- Fair remuneration
